

MONOBLOCK GEO 20×20

Mix and match to create one-of-a-kind decorations

MONOBLOCK geo

MONOBLOCK GEO is a series featuring modern design, which still refers to the traditional 20 x 20 cm format. Its smaller size allows you to take advantage of new arrangement possibilities while the colours available in the collection allow you to create unique concepts. The tiles are stylistically simple, while also being extremely decorative due to their shiny geometric patterns, an effect which was achieved by applying glossy ink to their matt surfaces. The glossy areas become even more visible when exposed to light, which creates a subtle but characteristic visual effect. Although arranged in an orderly way, the geometric patterns on the tiles amaze with their originality. They fill the interior with rhythmically repeating motifs while still leaving room for imagination. Apart from its aesthetics and universality of application, the unquestionable advantage of this option is its price. The cost of these decorative tiles is calculated per square metre and not per piece, which is unusual in the case of decorative tiles and typically turns out to be a great investment.

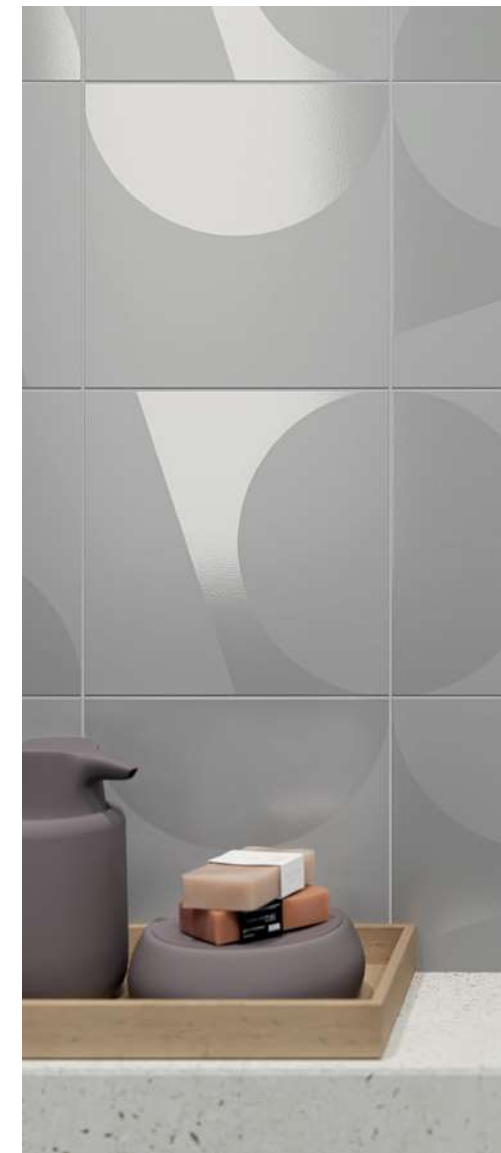

MONOBLOCK WHITE MATT GEO A & MONOBLOCK WHITE MATT GEO B & GRAND WOOD WARM GREY

Monoblock geo bathroom tiles are available in 3 highly sought-after colours – Monoblock geo white, Monoblock geo grey and Monoblock geo black. These colours perfectly harmonise with each other, so they can easily be combined or used independently based on what the project requires.
