MONOBLOCK 20 x 20

Compact format - modern design
Mix, match and create as you see fit

The shift towards modernity is a strong tendency within the furniture industry. The biggest event in the industry, the Cersaie trade fair, only served to underline this. Not only did modern materials dominate the designs being presented, but also the projects from the most renowned designers in the world, effectively becoming a symbol of good style as well as an awareness of what is currently the most fashionable form of interior design. With their latest collection, Opoczno proved once more that they are true experts when it comes to interior design trends. MONOBLOCK is a modern design placed on a smaller tile format. It was created in order to meet the requirements of the most demanding customers. The collection was inspired by a jigsaw puzzle, one which can be arranged in many ways by simply combining different colours and patterns.

MONOBLOCK colours/pastel

MONOBLOCK CREAM MATT/ MOCCA MATT 20 x 20 & GRAND CONCRETE QUENOS LIGHT GREY 59,8 x 59,8

MONOBLOCK COLOURS/PASTELS

The collection consists of solid base tiles in very subtle shades of milk. They are a fashionable and elegant material for almost any type of room. Tiles in bright, vivid colours are also available, allowing us to successfully complement even the boldest of designs. However, a compromise between these two options is available as well, thanks to the tiles in delicate pastel colours.

MONOBLOCK GREY MATT 3D EFFECT 20 x 20 & GRAND WOOD NATURAL SAND 19,8 x 119,8 & GRAND CONCRETE QUENOS LIGHT GREY 59,8 x 59,8

MONOBLOCK 3D EFFECT
These tiles use a special 3D effect so that they appear to be structural tiles from a distance, but in reality, their surface is completely flat. The attempt to create a 3D effect on a tile with a smooth surface is the first project of this type by the Opoczno brand.

MONOBLOCK BLACK MATT GEO A/ B 20 x20 & GRAND WOOD NATURAL SAND 19,8 x 119,8

**MONOBLOCK GEO**
This unorthodox, yet subtle effect was achieved through the placement of two images on each plate. The first image is a matte base, whereas the other is a shiny decorative element.
