## **INSTALLATION INSTRUCTIONS**

for the GENERA Manual Shower Toilet

**Installation should be carried out by a qualified person.**

Read the installation instructions and safety instructions carefully before installing the shower toilet.

## Symbols and their meaning

---

### Caution

This symbol indicates hazards that may lead to injury and/or damage to the shower toilet or other property if ignored.

## Safety instructions

---

The water supply line to the toilet should only be installed by qualified plumbers.

Follow national/regional standards and local installation regulations.

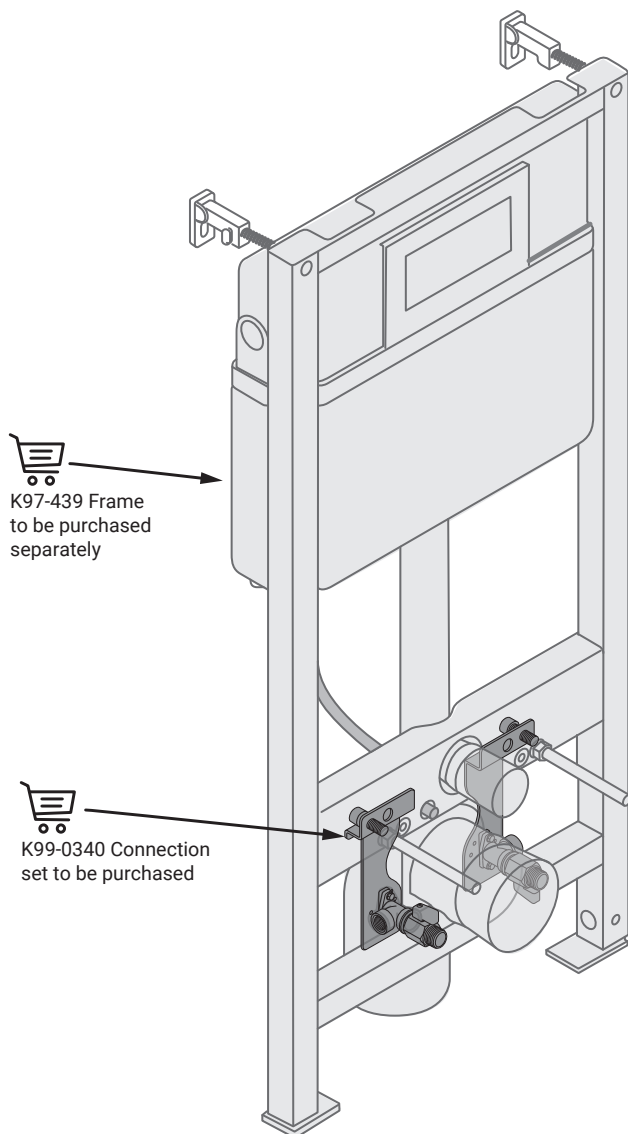

Do not install the device in a room where the temperature is below 4°C. This may result in damage to the device.

## Caution

---

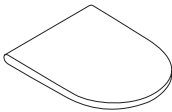

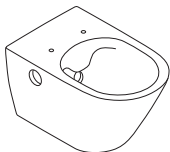

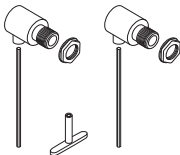

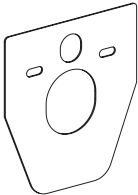

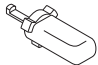

For easy installation, we suggest using the Eterna concealed installation kit (K97-439) with the Genera manual shower toilet connection kit (K99-0340)

## Summary of components

These instructions apply to installation with the K97-439 concealed kit and the K99-0340 connection kit. When installing on other manufacturer's frames, make sure in advance if it will be possible to install the bowl.

# Installing the ceramic wall-hung toilet bowl and preparing the water supply

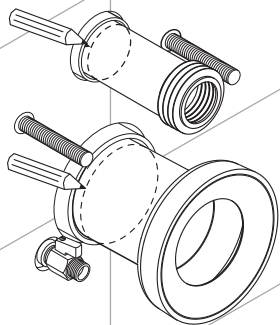

## Danger

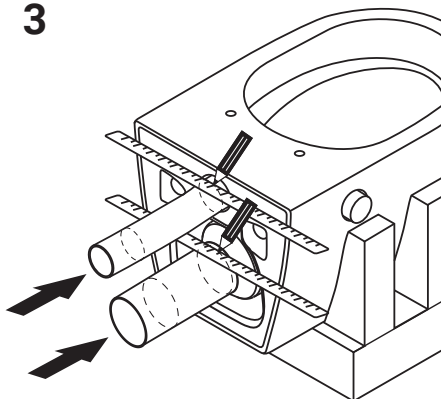

The installation of the bowl and the preparation of the water connection should be carried out by a qualified person with the appropriate authorization. If you break a ceramic bowl, use extreme caution. **Ceramic pieces are very sharp and can cause injury!**
